

7.7 Geologic Resources – Errata Sheet

	Incorrect Tier 1 Draft EIS Text/Table		Tier 1 Final EIS Text/Table (Volume 2) Page
	Page	Description	
1.	7.7-4	Landslide Susceptibility data was updated for Affected Environment to reflect moderate, high, and combination-high landslide susceptibility. In the previous analysis, data on landslide incidence was erroneously represented as data on landslide susceptibility. However, the data was similar in extent and this update does not affect the outcome of the analysis.	7.7-4
2.	7.7-4	Data was updated for Environmental Consequences in Table 7.7-2 to remove landslide susceptibility for the District of Columbia, add for Massachusetts, and remove for Alternative 1 in Connecticut. In the previous analysis, data on landslide incidence was erroneously represented as data on landslide susceptibility. However, the data was similar in extent and this update does not affect the outcome of the analysis.	7.7-4
3.	7.7-5	Data was updated for Environmental Consequences in Table 7.7-3 to remove landslide susceptibility for the District of Columbia and add for Massachusetts. In the previous analysis, data on landslide incidence was erroneously represented as data on landslide susceptibility. However, the data was similar in extent and this update does not affect the outcome of the analysis.	7.7-5
4.	7.7-6	Data was updated for Stations in Table 7.7-4 to add stations which geographically coincide with landslide susceptibility and remove stations which do not geographically coincide with landslide susceptibility.	7.7-6
